

HG 18 • HG 22
Drehimpulsgeber
Incremental Encoder

HG 18 • HG 22

Lagerloser Drehimpulsgeber
mit großer durchgehender
Hohlwelle für den Maschinen-
und Anlagenbau

*Incremental Encoder without
bearings with large through-
hole hollow shaft for plant
construction and engineering
industry*

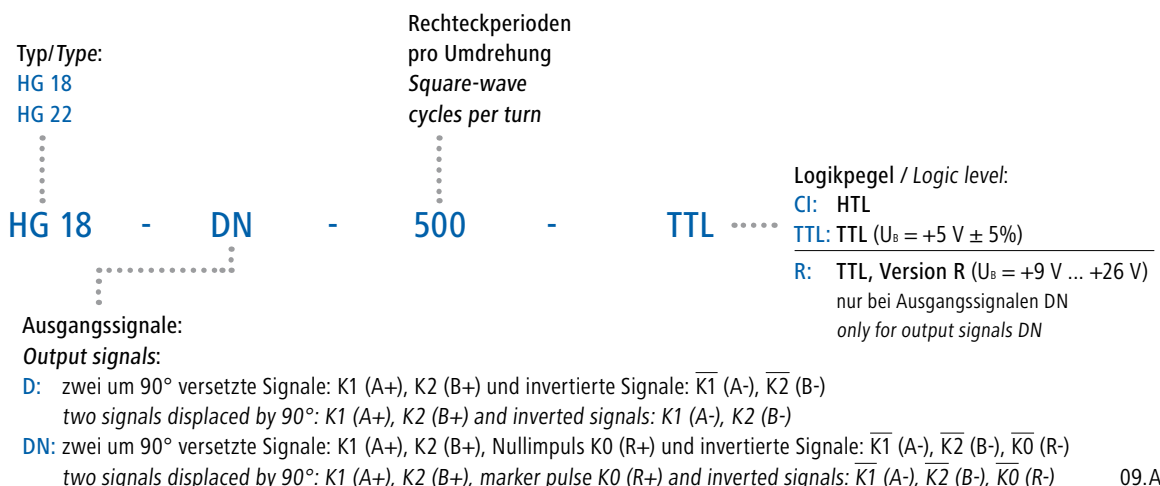

Besondere Eigenschaften:

- Robuste Konstruktion ohne eigene Lager, Inkrementalscheibe in axialer und radialer Richtung geschützt
- Durchgehende Hohlwelle
HG 18: Ø 65 ... 85 mm,
HG 22: Ø 90, 100, 110 mm
- Redundante Abtastung als Option (HG 18 M / HG 22 M)
- Kundenspezifische Modifikationen auf Anfrage
- Logikpegel TTL mit Betriebsspannung +5 V oder +9 ... +26 V (Version R mit internem Regler) - oder Logikpegel HTL mit Treiber-IC (Version C)

Special features:

- Rugged construction without own bearings, incremental disk protected in axial and radial direction
- Through-hole hollow shaft
HG 18: Ø 65 ... 85 mm,
HG 22: Ø 90, 100, 110 mm
- Redundant scanning optional (HG 18 M / HG 22 M)
- Customized modifications on request
- Logic level TTL with supply voltage +5 V or +9 ... +26 V (version R with internal regulator) - or logic level HTL with line driver (version C)

Allgemeine Daten / General data

Rechteckperioden pro Umdrehung <i>Square-wave cycles per turn</i>	z	HG 18: 250, 500, 512, 600, 1000, 1024, 1080, 1200, 2048, 2500 HG 22: 720, 1800, 4000 andere auf Anfrage / other versions on request			
Ausgabefrequenz <i>Output frequency</i>	f _{max}	120 kHz			
max. Drehzahl <i>Maximum speed</i>	min ⁻¹ rpm	elektronisch <i>electronic</i>	$\frac{7,2 \cdot 10^6}{z}$	mechanisch <i>mechanical</i>	10000 Option: 12000
Logikpegel <i>Logic level</i>		HTL (Version C)		TTL (RS-422)	
Betriebsspannung <i>Supply voltage</i>	U _B	+9 ... +26 V		+5 V ± 5 %	+9 ... +26 V (Version R)
Stromaufnahme ohne Last <i>Current consumption at no-load</i>		≈ 100 mA		≈ 100 mA	
max. Laststrom pro Kanal <i>Maximum load current per channel</i>	I _{source} = I _{sink}	60 mA Mittelwert / average 150 mA Spitze / peak		25 mA Mittelwert / average 75 mA Spitze / peak	
Tastverhältnis <i>Mark space ratio</i>		40 : 60 ... 60 : 40			
Impulsversatz <i>Square wave displacement</i>		70° ... 110°			
max. Axialversatz <i>Maximum axial displacement</i>		-0,5 mm ... +1,5 mm		Option: -0,5 mm ... +2,5 mm	
max. Radialversatz <i>Maximum radial displacement</i>		± 0,2 mm ohne Nullimpuls / without marker pulse ± 0,05 mm mit Nullimpuls / with marker pulse			
Trägheitsmoment <i>Moment of inertia</i>		HG 18 ≈ 21,2 kgcm ² HG 22 ≈ 67,3 kgcm ²			
Schwingungsfestigkeit (10 Hz ... 2 kHz) <i>Vibration resistance (10 Hz ... 2 kHz)</i>		≤ 100 m/s ² ≈ 10 g		IEC 60068-2-6	
Schockfestigkeit (6 ms) <i>Shock resistance (6 ms)</i>		≤ 1000 m/s ² ≈ 100 g		IEC 60068-2-27	
zulässige Temperatur am Geber <i>Permissible encoder temperature</i>		-30 °C ... +70 °C			
Schutzart <i>Protection class</i>		HG 18: IP 54 HG 22: IP 44			
Gewicht <i>Weight</i>		HG 18: ≈ 4,2 kg HG 22: ≈ 5,8 kg

Terminal strip

Ansicht A:
Flanschdose, 12-polig,
rechtsdrehend, Stiftkontakte
View A:
Flange socket, 12 pin,
clockwise, male contacts

Option: Abdeckhaube für Klemmring
Option: covering cap for clamping ring

Zubehör:

- Kabel HEK 8 und Stecker
- Frequenz-Analog-Wandler
- HEAG 121 P
- Digital-Konverter
- HEAG 151 - HEAG 154
- LWL-Übertrager
- HEAG 171 - HEAG 174

Accessories:

- Cable HEK 8 and plugs
- Frequency-analogue converter
- HEAG 121 P
- Digital converters
- HEAG 151 - HEAG 154
- Fiber optic links
- HEAG 171 - HEAG 174

Redundante Abtastung
Redundant scanning

All dimensions in millimeters (unless otherwise stated)
